

KEYPAD CONTROLLERS

Designed to US military specifications for shock, vibration, temperature and impact, these high quality, IP68 vandal-proof keypads contain the latest in solid state "Piezo" technology. With laser etched graphics and a 5-year warranty these stylish keypads are ideal for interior or exterior applications and represent the high quality and value for money that you have come to expect from PADDE. Two versions are available: a simple to program stand-alone single door controller for 200 users, and a 26 bit Weigand protocol keypad.
